This report presents a systematic method for developing reliable and valid performance-based assessments (PBA) of mariner proficiencies. The method is compliant with: the requirements of the International Maritime Organization's (IMO) Seafarers' Training, Certification and Watchkeeping Code (STCW Code), as amended in 1995; with all relevant U.S. Coast Guard Navigation and Vessel Inspection Circulars (NVIC); with Instructional Systems Development (ISD); and with the best practices of the maritime industry. The method guides the developer through five steps: (1) specify assessment objectives, (2) determine assessment methods, (3) specify assessment conditions, (4) develop proficiency criteria, and (5) prepare the assessment materials. The report provides materials for a developer's workshop, a stand-alone assessment development manual, and four sample assessments that have been developed by project participants. Guiding materials for the actual conduct of such assessments are provided in a separate report (R & DC-204). From geometric and numerical patterns to graphing non-linear figures, 50 reproducible activities make pre-

algebra less intimidating by exploring why formulas work rather than just having students memorize them. Students work individually or in groups on lessons covering variables, numerical relationships, equations, and patterns. Teacher pages give you objectives, prerequisite lessons, materials needed, and procedures for each activity. This guidebook offers teachers eight ready-to-use strategies to help students make good choices for good behavior in the classroom as well as in the real world.
