Malaria is endemic in 107 countries in tropical & subtropical regions, with sub-Saharan Africa hardest hit. About 400 million cases of malaria occur each year, leading to 1 million deaths. Over 80% of these deaths occur among African children under the age of 5. Funding to combat malaria has increased in recent years. International funding for malaria control has risen more than tenfold over the past decade. This report assesses progress in malaria control & analyzes how well countries are making available key interventions that reduce the malaria burden. Emphasizes progress across sub-Saharan Africa -- whose countries face the greatest malaria burden. Illus. The emergence of globalisation is bringing massive changes to all aspects of life, including language. In an effort to raise awareness on the effects of globalisation on language learning and teaching, the Applied Linguistics Association of Australia (ALAA) devoted its 31st Annual Congress to this theme. This volume represents a collection of papers by academics in Australia, South-East Asia, New Zealand, Europe and North America, which synthesize language learning and teaching theories and current research to present the views of applied linguists and language educators on a variety of issues with regards to the tensions that globalisation and internationalisation bring on language and languages. A total of twenty-two articles discuss issues related to the status of the ELT profession in a globalised world, issues of ESL teaching and language assessment, the ever increasing use of ICTs for foreign language learning, and the effects of globalisation on minority languages. This collection of articles attempts to integrate theoretical issues, research findings, and practical applications on different aspects of TESOL to provide academics, researchers, students and language educators with a discussion of the current state of affairs in the field of applied linguistics with regards to globalisation. Language users, such as survey respondents and interviewers, must speak the same language literally and figuratively to interact with each other. As diversity grows in the United States and globally, interviewers and respondents may speak a different language or speak the same language differently that reflects their own cultural norms of communication. This book discusses the role of language in survey research when comparisons across groups, cultures, and countries are of interest. Language use in surveys is dynamic, including words, symbols (e.g., arrows), and even emojis. The entire survey life cycle is carried out through language. Researchers write or translate questions and instructions that will address research questions and then pretest them using various techniques, including qualitative inquiry that focuses on context beyond just “the numbers.” Human or virtual data collectors use persuasive messages to communicate with survey respondents and encourage their survey participation. Respondents must comprehend and interpret survey questions and instructions to provide a response. All of these survey processes and products contribute to data quality, and the role of language is essential. Praise for *The Essential Role of Language in Survey Research* “This book highlights the importance of language issues for data quality, provides frameworks for conceptualizing the underlying processes, presents diverse methods for identifying problems at an early stage, and illustrates and evaluates potential solutions in the form of improved translation and pretesting procedures.” --Daphna Oyserman and Norbert Schwarz, University of Southern California “The role of language and issues of language are particularly salient for multinational, multiregional, or multicultural (3MC) comparative surveys that are designed to collect data and compare findings from two or more populations. This book highlights the critical need to consider a range of issues pertaining to language at various aspects and stages of 3MC survey design

and implementation.” --Julie de Jong, Kristen Cibelli Hibben, and Jennifer Kelley, University of Michigan, and Dorothee Behr, GESIS-Leibniz Institute for the Social Sciences, Germany “The need to reach increasingly diverse target populations requires survey researchers to be ever more aware of the role of verbal and nonverbal language in the survey research process. This book provides a great resource for readers new to the subject, as well as experts, seeking to understand the implications of language for survey design, implementation, and resulting data quality.” --Antje Kirchner, RTI International, and Coeditor of *Big Data Meets Survey Science: A Collection of Innovative Methods* “Covering a range of topics fundamental to high-quality surveys in cross-cultural contexts, this new volume features ‘language’ in its varied roles within survey methodology and practice, including questionnaire design, translation, and fieldwork implementation for quantitative and qualitative research. *The Essential Role of Language in Survey Research* uses in-country examples and analyses from across the globe to underscore specific challenges that survey researchers confront in their work.” --Patrick Moynihan and Martha McRoy, Pew Research Center

*Learning to Plan Modern Languages Lessons* contains a wealth of guidance and ideas for those learning to teach in secondary schools. Drawing on extensive experience and research in the field, it offers detailed explanation of basic lesson planning methods and the principles that underpin them, illustrated by worked examples of well-planned lessons. The book shows how to progress from planning smaller activities to full lessons to sequences of lessons, and how to ensure progression for your students. Specific aspects of language learning such as grammar and culture are explored, together with ideas for how to make your planning skills more effective in long-term collaborative and reflective practice. Starting from a presentation, practice, production (PPP) model of language teaching, the book aims to: provide structured, practical starting points in lesson planning for beginning teachers of modern languages (ML); deepen knowledge and understanding of ML as a subject and how it is learnt (pedagogical subject knowledge), in order to inform and support planning decisions; develop understanding of lesson planning as part of a planning cycle; enhance understanding of strategies and professional development opportunities to promote the further development of planning abilities. Including reflective/discussion tasks and example lesson plans
